Builders and Architects

Ledge, Boral ProStone® offers a sophisticated look that you can feel good about.

Boral ProStone® is molded from natural stone which creates a texture that is detailed, varied, and remarkably realistic. Plus it's made from lightweight aggregates, Portland cement and iron oxide pigments, which make it durable and easy to install. Boral ProStone® is applied using the same tools and techniques as masonry but because of its light weight, it doesn't require a brick ledge or wall ties, making installation simpler with less mess and less waste.

The GREENGUARD® Environmental Institute recently named Boral Stone Products LLC as the first stone veneer manufacturer to qualify for its Indoor Air Quality Certification and stringent Children & Schools product emission standards. All GREENGUARD® products have been tested for chemical emissions performance. The certification reflects Boral's corporate commitment to sustainability and healthier indoor environments.

"Boral ProStone® is a manufactured stone veneer that gives you the durable beauty and authentic look of natural stone at affordable prices. With Boral ProStone® Veneer's natural textures and variety of colors it was an obvious choice for Indigo Architecture, Inc. of Las Vegas. The quality and aesthetic appearance we received on The Village at Craig retail center developed by GreenStreet Properties of Nevada was outstanding. As a matter of fact it was so successful GreenStreet asked Indigo to specify Boral ProStone® on additional projects."
